About

About Dr. Mehmet Dağhan

Dr. Mehmet Dağhan is an oral and maxillofacial surgeon at BM Turkiye in Istanbul. He oversees implant surgery, from a single implant to full-arch All-on-4 and All-on-6, and the bone grafts and sinus lifts that prepare the jaw for them. He speaks Turkish, English and Arabic.

Treatment approach

- Reviews your photos and X-rays before you travel
- Explains your plan and its price in writing before treatment starts
- Follows your recovery with your coordinator after you return home

Languages
English · Turkish · Arabic

Education
Şam üniversitesi/ Okan üniversitesi · 2022

Dental Implants

Where Dr. Mehmet Dağhan can help you

Tooth Implant	Single-tooth implant replacement restoring function and aesthetics with stable osseointegration.
All-on-4 Dental Implants	Full-arch fixed restoration supported by four strategically positioned implants.
All-on-6 Dental Implants	Full-arch fixed restoration supported by six implants, giving the bridge more points of support than a four-implant plan.
Zygomatic Implants	Long implants anchored in the cheekbone, for an upper jaw that has too little bone for regular implants or bone grafting.
Implants for Multiple Teeth	Strategic implant planning for replacing several missing teeth with fixed prosthetic support.
Bone Grafting	Bone-volume augmentation to support future implant placement where natural volume is insufficient.
Sinus Lift	Upper-jaw sinus augmentation to create vertical support for posterior implant placement.
